FA350WY

Piloto convencional estroboscópico para interior en techo. 24Vcc. IP65. Blanco con lente ámbar.

General

The FA350WY is a general purpose LED beacon for fire alarm applications. Which features a special base containing all wiring connections and allow for easy removal/placement of the beacon.

Easy and Fast Installation

The FA350WY beacon allows faster installation and maintenance thanks to an innovative mounting base. Dispensing with the need for locking screws, these sounders use TimeSaver™ bases from the 630 series detectors. Heads are simply locked onto the base with a “twist and click” action, allowing fitting or removal at any time because the base is the only component that needs to be wired. As the cabling requirement is reduced, commissioning time and costs are naturally reduced as well.

Efficient and versatile

The mechanism for locking the beacon to the base, can be activated if required. Once activated, a special tool is required to remove the sounder from the base.

The FA350WY beacon utilises a full faced translucent sounder case, giving a much larger lens area and a greater spread of light.

Detalles

- Low current consumption
- Anti-Tamper locking mechanism
- Shallow mouting base
- Wiring directly to base
- High efficiency LED's
