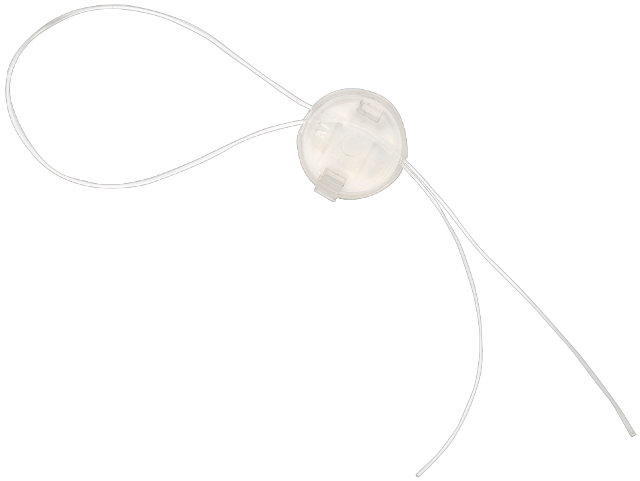
N-MC-BS

MCP accessory, intelligent Manual Call Point breakable seal

General

The N-MC-BC is an anti-tamper, breakable seal for manual call points. It allows the manual call point flip cover to be "locked" to the manual call point, forcing a 3-stage operation and eliminating accidental or tamper alarms. The seal can be easily removed without the need for special tools.



Details

- Provides tamper protection for manual call points, limiting unwanted alarm activation
- Provides a 3-stage, secure operation before manual call point activation
- Easy to install without tools reducing installation time
- Easily breakable without tools for low risk, ease of operation
- Visually unobtrusive, protecting the aesthetics of the manual call point
